SKILLS & CERTIFICATES

Skills: Python, Java, SQL, HTML/CSS, C#, ASP.NET, React, UML, UiPath, Power BI, Tableau, Databricks, Vega-Lite, Microsoft Office
Packages & Libraries: NumPy, Pandas, Scikit-learn, OpenCV, OpenVINO, Matplotlib, TensorFlow, Keras, NLTK
Languages: English, Urdu, French (basic), German (basic)
Certificates: UiPath Agentic Automation Associate, Cisco IT Essentials, ZAKA Machine Learning Engineer, Udacity Data Analysis Fundamentals, IEEE Researcher

EXPERIENCE

e& (Etisalat) **Dubai, UAE**
Analyst – CVM / SMB & Robotics Dept – Reporting to Director of CVM & SMB *April 2025 – Present*

- Own the end-to-end email marketing (EDM) pipeline: customer base analysis, targeting and retargeting rules, and personalised campaigns in English, Arabic, Urdu and Hindi, continuously optimised on campaign performance.
- Designed lead routing logic and robots to allocate leads within and across departments by agent availability and workload; improved lead-to-contact speed by 33% and ownership transparency. Solution adopted by internal IT for organisation-wide rollout.
- Migrated UiPath/Python robots to the cloud, running scripted automations unattended without dependence on local machines.
- Built and deployed UiPath/Python robots and proofs of concept across business units and for external use cases; reduced manual handling by 30% and cut cycle time by 7 hours/week per team.
- Fully automated outsourced call centre operations and centralised near-real-time reporting on AHT, FCR, SLAs and agent productivity for VP/SVP, with daily reports on revenue, retention, channel partners and opportunities.
- Built and maintained Power BI/Databricks dashboards for the Director, VP and SVP: revenue pacing, lead pipeline health, closures vs. disqualifications and initiative progress.
- Built LLM-powered tools to summarise daily operational updates and generate automated insights for Director/VP-level reporting.
- Developed proofs of concept for acquisition prospects and analysed cost-reduction and revenue opportunities for 2030 tech initiatives.
- Implemented frameworks to identify new commercial and residential opportunities and route them to the right teams; orchestrated segment migrations (commercial ↔ residential/SMB) with data mapping, policy rules and CRM updates, achieving zero-defect handover with clear audit trails.
- Lead an enablement pod: train and mentor 1 intern and 3 graduate trainees in robotics, AI and Python, end to end.

Stealth Startup (Prototype Stage) **Dubai, UAE**
Co-founder *April 2024 – April 2025*

- Co-led a team of 4 building a wellness-centric health analytics platform in Dubai.
- Conducted user interviews, competitor analysis, a feasibility study and balance sheets for a future go-to-market.
- Developed end-to-end ML pipelines for biomarker extraction, PDF parsing and health scoring using Python, Scikit-learn, TensorFlow, CrewAI and LLMs.
- Built the MVP with React, AWS, Python, FastAPI and Supabase, including a production-grade FastAPI backend integrating OCR, statistical models and multi-agent reasoning for personalised health analytics.
- Designed the brand and UI/UX in Figma and Canva, then translated it into the web front end.
- Project currently paused due to bandwidth constraints.

Meydan Free Zone **Dubai, UAE**
Artificial Intelligence Intern – Marketing Dept *Nov 2023 – April 2024*

- Lead developer of Meyda, an AI assistant chatbot for lead generation that captures leads and stores them in the CRM; led a team of 3 interns.
- Developed client emailers and assisted in rebranding the official website.

General Motors **Dubai, UAE**
Legal Intern *Aug 2022 – Nov 2022*

- Organised and managed GM's legal documentation, including documents past retention periods.
- Created meeting agendas and presentations.

SchemaZone **Dubai, UAE**
Project Manager Intern *March 2022 – April 2022*

- Led a team of 3 across two projects and pitched the solution to judges in China.

Huawei Seeds for the Future Program **Dubai, UAE**
Training camp: Android development, cloud computing, AI & ML, 5G *October 2021*

- Presented project ideas and solutions to a panel of senior industry professionals; competition runner-up.

EDUCATION

The British University in Dubai **Dubai, UAE**
Bachelor of Science in Computer Science, Concentration in Artificial Intelligence *Sept 2020 – July 2024*
CGPA: 3.81/4.00, graduated with distinction; 50% scholarship for all 4 years.

The International School of Choueifat **Dubai, UAE**
American High School Diploma, Final Grade: A *July 2020*

Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Architecture, Computer Communications and Networks, Database Systems, Software Engineering, Software Design and Architecture, Software Construction, Web Development, Data Visualization, Introduction to AI, Machine Learning, Natural Language Processing, Agent-Based Systems, Robotics, Internet of Things, Calculus, Linear Algebra, Statistics, Engineering Economy and Entrepreneurship.

HONORS & AWARDS

- 50% academic scholarship, The British University in Dubai (2020–2024)
- Runner-up, Huawei Seeds for the Future competition (October 2021)
- Published young adult novel (March 2022)
- ZAKA Machine Learning Engineer certification (May 2023); DELF A2 in French (July 2018)

RELEVANT PROJECTS

Ready.Set.Eat **Dubai, UAE**
Food recommendation system
- Implemented object detection and AI-based recipe generation via API endpoints, with a React/HTML/CSS interface.
- Presented at Sandooq Al Watan 2024 and to the UAE Minister of AI.

Smart Green House **Dubai, UAE**
Greenhouse management system
- Developed an AI system that detects plant diseases in real time, with a web app hosting the ML backend for image uploads.

Kazu **Dubai, UAE**
Virtual student assistant
- Co-developed an AI assistant that summarises long research papers and answers questions about them.

Jardin De Fleurs **Dubai, UAE**
E-commerce store
- Built a flower storefront with bouquet builder, inventory management, and separate admin and customer access.
